Your Vision is Our #1 Priority

"After seeing us, you will look as great as you can see"

20/20 Optometry of Silicon Valley opened in San Jose at the end of 2000. There was a need and a demand for a convenient eye doctor that catered to all those who work in the Silicon Valley.

This office has continued to grow strong because we try to meet the needs of our patients. One of our strongest attributes is our customer service. Our optometrists are trained to address the cause of your eye-related problems and not just the symptoms. The doctors can treat allergies, infections and various eye diseases. We design specialty computer eye glasses for all of our computer users, successfully treat dry eyes and offer many solutions and treatments for your visual symptoms. Our eyewear stylists will then help you easily find eye glass frames that will fit your personality and lifestyle. Eye contact lenses from 1-day disposables to custom contact lenses for irregular corneas are also available at our office.
